Logging in · Finding your way around · Saving your changes · Pictures and lists · Team roles · Staff and client logins · Overview · Leads · Call bookings · Clients and portal · Client feedback · Google reviews · Lead emails and alerts · Quotes and invoices · Expenses and profit · Interns · Attendance and leave · Payslips · HR letters · Certificates · Home page · Homepage hero · Page headers and Page banners · About and stats · Careers (jobs) · Internship · City pages (local SEO) · Services · Projects · Products · Industries, Process steps and Testimonials · Trusted by (clients) · Goal picker and Project planner · Showreel video · Company profile (PDF) · Chatbot and FAQ · Blog posts · Media · Logo and company name · Contact details · Colour theme · Intro & cursor · SEO · WhatsApp and analytics · Team and roles (owner only) · API keys (owner only) · Automation (owner only) · Backup and restore · History, Activity log and My account · Everyday tasks · If something goes wrong

01 Getting started

Logging in

Open **spinexitsolutions.com/admin** and enter your **Email** and **Password**, then press **Log in**.

- **Two-step login:** if it is on, type the 6-digit code from your authenticator app (Google Authenticator or similar). Lost your phone? Type one of your backup codes instead.
- **Forgot password?** Type your admin email (or your recovery email) and you will get a link to set a new password. The link goes to the **Recovery email** from **My account**, if one is set. Changing the password logs you out on all other devices.
- If you have 2 or fewer backup codes left, the panel reminds you to make new ones in **My account**.

Finding your way around

- **Sidebar: Overview** is at the top. Everything else is in groups: **CRM**, **Sales and accounts**, **HR and team**, **Website pages**, **Website content**, **Blog and media**, **Site settings**, **Admin and security**. Click a group name to open or close it.
- **Find a section...** at the top of the sidebar searches every section by name. Type "invoice" or "logo" and jump straight there.
- **Purple numbers** next to a section mean something new arrived since you last opened it (new leads, bookings, client messages, leave requests, accepted quotes, feedback, applications). They refresh every 20 seconds.
- **View site** (top right) opens the live website. **Help guide (PDF)** at the bottom of the sidebar opens this guide.
- On a phone, use the menu button at the top left to open the sidebar.

Saving your changes

Website sections (pages, content and settings) work like a draft until you publish:

Button	What it does
Save and publish	Puts your changes live on the website for everyone. Shows **All saved** when nothing has changed.
Preview	Opens the website in a new tab with your unsaved changes. Only you can see it.
Discard	Throws away your unsaved changes.

- Some sections have their own buttons instead: **Blog posts** (Save / Publish), **Media** (saves on upload), **Certificates** (Save certificate), and most CRM, sales and HR screens (**Save**, **Save settings**).
- If someone else saved while you were editing, you will see **Not saved** with a **Reload** button. Your changes stay on screen.
- Made a mistake after saving? **History** keeps the last 40 versions of the website content (see Admin and security).

Pictures and lists

Any picture field gives you four ways to add a picture: **Upload**, **Library** (from Media), drag a file onto the box, or paste an image link. The small **X** removes it.

- Upload JPG, PNG, WebP, GIF or AVIF images, under about 4 MB each.
- Big photos are made smaller automatically: up to 2000 px wide, or up to 12000 px tall for full-page screenshots.

Lists (services, projects, testimonials and so on) all work the same way:

- Click an item's name to open it.
- Use the arrows to move it up or down, and the bin icon to delete it.
- Use the dashed button at the bottom (for example **Add project**) to add a new one.

Team roles

Each person on the team gets a role. The owner can then set each area to **No access**, **Only view** or **View and change**. Someone with view-only access sees a **View only** banner and can't save.

Role	What it can do
Owner	Everything, including team members
Admin	Everything except team members, API keys and backups
Manager	Leads, clients, invoices, website and interns. No salaries, profit or bank details
Content editor	Website content, blog, media and SEO
Blog writer	Writes and publishes blog posts only
Marketing / SEO	Website content, blog, SEO, tracking codes, and where leads come from
Designer	Image library; can look at website content, blog and client projects
Sales	Leads, quotations, invoices and the client portal
Telecaller	Calls and updates leads only
Support executive	Client portal: support requests, AMC, project updates and files
Project manager	Client projects, files and support; can look at leads and invoices
Accountant	Invoices, payments, billing details, expenses, profit and GST; can look at payslips
HR	Interns, job applicants, certificates, HR letters and payslips
Viewer	Can look at most things but change nothing (no salaries or profit)

> **Team and roles**, **API keys** and **Automation** are always owner-only.

Staff and client logins

- **Staff portal** (`/staff`): employees log in with their work email and a 6-digit code sent by email. There they can **Check in** and **Check out**, see their **Leave balance**, **Apply for leave**, see their attendance calendar and download **My payslips**.
- **Client portal** (`/portal`): clients log in with their email and a 6-digit code. There they can:
- follow project stages and updates
- download and send files
- view and pay quotations and invoices
- raise support requests
- renew their maintenance plan

02 Overview and CRM

Overview

The first screen after login. It shows shortcut cards for every area you can open, plus key numbers:

- **Number tiles: New leads this week**, **Follow-ups due** (red when above 0), **Won so far**, **Win rate**, **Interns**, **Job applicants**, **Certificates issued**, **Blog posts live**, **Images in media**. Click a tile to open that section.
- **Charts: Leads per month**, **Lead status**, **Where leads come from**, **Most asked services**, **Latest leads**.

> **Daily habit:** if **Follow-ups due** is red, click it and call those leads first.

Leads

Every enquiry lands here: website forms, the project planner, product demo requests, city pages, call bookings, and Meta or Google lead ads.

You can:

- Filter with the tiles: **All**, **New**, **Contacted**, **Quote sent**, **Won**, **Lost**, **Follow-up due**, **Given to me**.
- Search by name, phone or message, or filter by source.
- Open **Where leads come from** to see leads, wins and value by source and campaign.
- **Download Excel** of all leads.
- Set up **Get leads from ads** (Meta and Google Ads) and the automatic **Follow-up emails** (up to 4 emails, each after a set number of days).

Work a new lead:

1. Click the lead's name to open it.
2. Press **Call**, **WhatsApp** or **Email**.
3. Set **Status** (for example Contacted) and **Deal value (₹)**.
4. Set **Follow up on** (Tomorrow, In 3 days or Next week) and write **What to do**.
5. Choose who it is **Given to**, then press **Save**.
6. When the client is ready, press **Make quotation**. Their details are filled in for you.

> - Giving a lead to someone sends them an email.
> - Marking a lead **Won** can automatically ask the client for feedback or a Google review.
> - The **Notes** box can be read by anyone on the team who can open that lead. Clients never see it.
> - **Delete** can't be undone.

Call bookings

Visitors book a free call at `/book`. This section lists the calls and holds the booking settings.

You can:

- See **Upcoming** and **Past and cancelled** calls.
- On each call: **Join Meet**, **Call**, **WhatsApp**, mark **Call done** or **Didn't join**, **Cancel** (this emails the client), or add a private note.
- In **Settings**, set:
- **Length**, **Break after each call** and **Most calls in a day**
- your weekly hours and **Days off**
- **How you meet**: Google Meet, a fixed link, or a phone call
- **Topics to choose from**
- **Send reminders**

Turn booking on:

1. Open **Settings**.
2. Set your hours and call length, and choose how you meet.
3. Press **Save settings**, then flip the switch on.
4. **Copy** the booking link and share it.

> Reminders reach the client a day before and an hour before the call. They work only while the scheduler in **Automation** is running.

Clients and portal

Manage the clients who log in to `/portal`: their projects, progress, files, invoices, maintenance plans (AMC) and support requests.

Onboard a client:

1. Press **Add client**. Enter **Contact name** and **Email** (their login), then press **Add and open**.
2. In **Projects**, press **Add project**. Fill in the name, dates and **Next step**, add **Stages**, and press **Now** on the current stage.
3. Press **Save** at the top. The client sees changes only after you save.
4. Press **Email portal invite**.

Tabs on a client's page:

- **Projects:** stages, updates and links for each project.
- **AMC:** the yearly maintenance plan, renewal reminders, **Make renewal invoice** and **Renew for 1 year**.
- **Files:** share files with the client and download what they send.
- **Invoices:** tick which quotes and invoices this client can see.
- **Support:** read and reply to requests, then **Close** or **Reopen** them.
- **Details:** contact info, **Private notes** (clients never see these), **Client can log in**, **Delete client**.

> - A **one-time login link** works once and expires after 7 days.
> - Marking a project **Completed** can automatically ask the client for feedback.
> - **Delete client** removes their projects, files and support requests. Their quotes and invoices stay.

Client feedback

Collect star ratings and comments. You approve the good ones and they show in Testimonials on the home page. Ratings of 3 stars or less show a **Call [name]** button, so you can fix the problem quickly.

Publish a good review:

1. Open **Answers** and find one marked *Waiting for approval*.
2. Fix spelling if needed, keeping the client's meaning.
3. Press **Approve for website**.

Asking clients for feedback:

- In **Ask and settings**, use **Ask a client now** to send the form by email.
- Or turn on **Ask automatically**: **When a project is marked Completed** or **When a lead is marked Won**, with an optional reminder.

Google reviews

Shows your Google rating and reviews on the home page, and asks clients to write a review.

On the website tab:

- **Live from Google (recommended)** needs your **Google Place ID** and a Places API key in **API keys**. It shows up to 5 reviews.
- **Typed in here** lets you enter the rating and reviews yourself.

Ask for reviews tab:

1. Fill in **Ask a client now**.
2. Press **Email the review request**.
3. Or turn on **Ask automatically**.

> Nobody is asked twice within 6 months. Automatic requests need the scheduler in **Automation**.

Lead emails and alerts

Thank-you email to new enquiries:

1. Tick **Send the thank-you email**.
2. Edit the **Subject**, **Heading** and **Message**. You can use `{name}`, `{service}`, `{phone}`, `{email}` and `{company}`. Check the live preview.
3. Optionally tick **Add a "Chat with us on WhatsApp" button**.
4. Press **Save and publish**.

WhatsApp alert to you:

- Tick **Send me a WhatsApp alert for new enquiries**. The number and service are set in **API keys → WhatsApp alerts**.

> At most one thank-you email goes to each address per day.

03 Sales and accounts

Quotes and invoices

Make GST quotations and invoices, send them to clients, track payments, and set up monthly bills.

First time: fill in Billing details

Enter your **Business name (as on GST)**, **Address**, **GSTIN**, **PAN**, bank and UPI details, default GST rate and SAC code, and up to 6 **Signatures**. Then press **Save billing details**.

> With no GSTIN filled in, no GST is charged on your documents.

Quote, then bill:

1. Press **New quotation**, or **Make quotation** from a lead.
2. Fill in the client and items (**Add item**, **SAC**, **Qty**, **Rate**, **GST**), then press **Save**.
3. Press **Email to client** or **WhatsApp**. The client can **Accept** or **Request changes** online.
4. Once accepted, press **Make invoice**.
5. Enter **Payment received (₹)** as money comes in. The status changes to Unpaid, Partly paid or Paid automatically.

Also here:

- **PDF** download, **Copy client link**.
- **Repeat every month** and the **Monthly bills** tab, for retainers. Set how often and the next invoice date.
- **Payment reminders:** automatic email or WhatsApp reminders around the due date, plus **Send reminder now** and **Stop reminders** on each invoice.
- Status tags: Overdue, Viewed, Accepted online, Changes asked.

> - An accepted quotation is locked. Make a new one to change it.
> - If an invoice was already sent, mark it **Cancelled** instead of deleting it.
> - Online (Razorpay) payments are added automatically.

Expenses and profit

A monthly profit-and-loss view and a GST summary for your CA.

The tabs:

- **Profit and loss:** sales (before GST), expenses, salaries and profit for each month of the financial year. **Download (Excel)**.
- **Expenses:** press **Add expense** and fill in **Date**, **Category**, **Paid to**, **Amount before GST**, **GST on the bill**, **Vendor GSTIN** and **Paid via**. Tick **Repeats every month** for rent and subscriptions.
- **GST for CA:** GST collected, input credit, and **GST to pay** for any period, with **Download for CA (Excel)**.

- Sales are counted by invoice date. Quotations and cancelled invoices are not counted.
- Add the vendor's GSTIN to claim input credit.
- This is a management report. Your CA's books are final.

04 HR and team

Interns

Internship and job applications, and intern records from *Applied* to *Completed*.

You can:

- Switch between **Interns** and **Job applicants**.
- Filter by status: **Applied**, **Selected**, **Working**, **Completed**, **Not selected**.
- **Add intern**, **Paste application** (it fills the form for you), **Download Excel**.
- On each person: change status, open the resume, make a letter, **Issue certificate**.

Finish an internship:

1. Set the status to **Completed**.
2. Press **Issue certificate**.
3. Choose **OK** to issue and email it, or **Cancel** to issue without email.
4. Use **Download PDF / Print** if you need a copy.

> - Changing the status to Selected or Not selected asks whether to email the person.
> - A certificate is issued only once per intern.
> - Deleting an intern also deletes their resume.

Attendance and leave

Leave requests:

- Waiting requests have an amber border.
- Press **Approve**, **Approve as unpaid** or **Don't approve**, with an optional note. The employee gets an email.

Monthly attendance:

- Click a day to mark **Present**, **Half day** or **Absent (no pay)**.
- Choose **Automatic** to use leave and check-ins instead.

Holidays and leave rules:

- Choose **Present unless marked** or **By check-in**.
- Set weekly offs, leave types (days per year, paid or unpaid) and holidays.
- Press **Save**.

> Employees must be added in **Payslips → Employees** before they appear here.

Payslips

Add employees once:

1. In **Employees**, press **Add employee**.
2. Fill in their details and salary. Use **Quick fill from monthly gross** to split it into Basic, HRA and Special.
3. Add deductions (PF, ESI, professional tax, TDS).
4. Press **Email staff portal invite** so they can log in at `/staff`.

Run monthly payroll:

1. Pick the **Month** and press **Make payslips**.
2. Open any payslip shown in amber (fewer paid days) and check it. Use **Update from attendance** if needed.
3. Press **Issue and email all**.

> - Issued payslips are locked. **Edit again** cancels the old verification code, and a new one is given when you issue again.
> - Salary changes apply only to payslips made after the change.

HR letters

Make letters with a verification QR code:

- **Hiring:** Job offer, Appointment.
- **Internship:** Internship offer, Internship completion.
- **During employment:** Confirmation, Salary increment, Promotion.
- **Leaving:** Experience certificate, Relieving letter.
- **Certificates:** Salary certificate, Employment verification, Recommendation, NOC.

Press **Guide: which letter when** for help choosing.

Make an offer letter:

1. Press **New letter**, then **Job offer letter**.
2. Fill in the person, the details and the **Salary break-up** (**Fill from CTC**).
3. Press **Save** and check the preview.
4. Press **Email to person**. This also issues the letter.

> - Drafts carry a DRAFT mark until issued.
> - To cancel an issued letter, **Revoke** it rather than deleting it. The verify page will then show it as no longer valid.
> - Company details and signatures come from **Billing details**.

Certificates

Design the internship certificate and see every certificate issued.

- Edit the **Title** and **Main text**. You can use `{name}`, `{role}`, `{company}`, `{start}` and `{end}`.
- Add up to 3 signers (name, designation, signature image), then press **Save certificate**.
- New certificates are issued from **Interns**.
- Anyone can check a certificate at `/verify` using its number.

> Signature images look best as transparent PNGs.

05 Website pages

Home page

Choose which sections show on the home page, in what order, and the heading above each one.

1. Under **Sections on the home page**, press **Shown** to switch a section to **Hidden**, or back.
2. Use the arrows to change the order. The hero always stays first.
3. Edit the **Heading** and **Short line** for each section, and the **Tools** strip (names separated by commas).
4. Press **Save and publish**.

> A hidden section keeps its content and can be shown again at any time.

Homepage hero

The big first block of the home page. A live **Preview** at the top shows your changes as you make them.

Seven designs:

Design	Looks like
Live build	Text on the left, an animated browser building sites on the right
Centred	Big centred headline on a moving dot grid
Photo split	Text on the left, a large photo with a stat card on the right
Full screen photo	Photo or video across the whole screen with white text
Work tiles	Headline above tiles of your latest projects
Dark aurora	Dark background with moving coloured light
Big type	Very large headline with a band of moving services

Change the hero:

1. Click a design card. The preview updates straight away.
2. Edit the **Keyword line**, **Headline**, **Highlight words** and **Supporting text**.
3. Set the two buttons. Leave a button's text empty to hide it.
4. Add a **Photo** if the design uses one (at least 1600 px wide). For Full screen photo, use **Darkness over the photo** to keep the text readable.
5. Press **Save and publish**.

> - The **Keyword line** is part of the main page heading on Google. Put your main search phrase there.
> - Highlight words must appear exactly in the headline.

Page headers and Page banners

- **Page headers:** the **Heading** and **Intro text** at the top of About, Services, Products, Work, Contact, Internship, Blog and Careers.
- **Page banners:** the large image behind each of those headings, plus a fallback cover photo for blog posts that don't have their own.

About and stats

About section: Heading, **Main text**, **Highlighted note** and **Image**.

Numbers: press **Add number** and enter a **Value** (for example 50+) and a **Label**.

> - Use real numbers only.
> - The first numbers also appear in the hero (with **Show 2 stats** on) and in the Company profile PDF.

Careers (jobs)

1. Tick **Accepting job applications**.
2. Write the intro and **Why work with us**.
3. Press **Add job** and fill in the **Job title**, **Type**, **Location**, **Experience**, **Salary** (optional), **What they'll do** and **Requirements**.
4. Press **Save and publish**.

Applications arrive in **Interns → Job applicants**.

Internship

- Tick or untick **Accepting applications**. When unticked, the form is hidden and a "closed" message shows.
- Edit the **Intro text**, **What interns get**, **Duration options** and **Work mode options**.
- Press **Add role** to add an internship role, with **Role name**, **What they'll do** and **Skills needed**.

Applications arrive in **Interns** automatically.

City pages (local SEO)

One page per city (for example `/website-development-jaipur`) to show up in local Google searches.

1. Press **Add city**. Fill in the **City**, **Main heading**, **Intro**, **Google title** and **Google description**.
2. Add the local numbers, 4–6 services for that city, the areas you serve, nearby cities and FAQs.
3. Tick **Show on website**, then press **Save and publish**.

> **Write each city page in its own words.** Google ignores pages that only swap the city name. Add only cities where you really work.

06 Website content

Services

Your services show on the home page and on `/services`, and each one gets its own detail page.

1. Press **Add service** and enter the **Name**, **One-line summary**, **Description**, **Highlights** and **Image**.
2. Set the **Page address**, **Page title for Google** (under 60 characters) and **Description for Google** (140–160 characters).
3. Fill in **What you get**, **Page text** and **FAQs**.
4. Press **Save and publish**.

> - **Page text** formatting: `##` for headings, `-` for lists, `**bold**`.
> - **FAQs:** the question on one line, the answer on the next, and a blank line between pairs.

Projects

Your portfolio. The first 6 projects show on the home page, all of them on `/work`, and each can have its own case study page.

Add a website project:

1. Press **Add project**. Enter the **Project name** and set **Category** to a service name (for example Website Development).
2. Set **Show as** to *Website / app (laptop + phone)*, or leave it on Auto.
3. Upload the **Cover image**, a **Full-page screenshot** (it scrolls inside the laptop) and a **Mobile screenshot**.
4. Add the **Live link** and **Results** (for example "Leads per month: 40 → 180").
5. For a case study page, fill in **The challenge**, **What we did**, **The result** and the client's words.
6. Press **Save and publish**.

Show as frames:

- Website / app
- Social media (Instagram profile)
- Video (wide or reel)
- Ads and marketing
- Graphic design
- E-commerce management
- On-demand app

> - Each field's hint says which frame uses it.
> - Leave **Client name** empty if the client wants to stay private.

Products

Your own software or SaaS. Each product gets a page at `/products/...` with a **Book a demo** form.

- Fill in the **Product name**, **One-line pitch**, **Status** (Live, Beta, Coming soon or Don't show), **Price**, **Cover screenshot**, more screenshots, **Key features**, demo and YouTube links, page text and FAQs.
- The Products menu link appears once you add the first product.
- Demo requests arrive in **Leads**.

Industries, Process steps and Testimonials

- **Industries:** the "Who we work with" section. Each has a **Name**, **Description**, **Key points** and **Image**.
- **Process steps:** the steps of how you work, in order. Each has a **Name**, **Time**, **Description** and **What the client gets**. Each step keeps its picture by position.
- **Testimonials:** press **Add testimonial** and fill in **Client name**, **Role and company**, **What they said**, **Stars** and an optional photo. Use real client quotes only. Without a photo, the client's initials are shown.

Trusted by (clients)

A strip of client logos or names just below the hero.

1. Press **Add client** for 4–5 clients. The logo is optional; a transparent PNG looks best.
2. Tick **Show the client logo strip** and write the line above the logos.
3. Optionally tick **Show the rating** and enter your Google rating and number of reviews.
4. Press **Save and publish**.

> Only add clients who are happy for their name to be shown.

Goal picker and Project planner

- **Goal picker:** the "I want to..." choices on the home page. Each goal has **Button text**, **Sentence ending**, **What we'd do** and **Related service ids**. Copy the ids exactly from the list at the top of the section.
- **Project planner:** the time estimator on the home page.
- Set **Min days** and **Max days** for each service. Tick **Monthly** for ongoing services.
- Add **Project sizes** with a **Multiplier** (1.5 means 50% longer) and **Extras**.
- Enquiries from the planner arrive in **Leads**.

Showreel video

- **Heading**, **Video URL** (MP4) and **Cover image**, for computers.
- **Phone video URL (portrait 9:16)** and **Phone cover image**, for phones.
- Leave the phone video empty to use the wide video everywhere.
- Show or hide the section from **Home page**.

Company profile (PDF)

A printable company brochure at `/company-profile`.

1. Edit the **Cover page**, **About us page** and **Last page** text.
2. Tick the pages to include. Numbers, services, industries, process, projects and quotes are filled in from their own sections.
3. Press **Save and publish**, then **Download PDF**.

> Tick **Anyone with the link can open it** to show it in the website footer.

Chatbot and FAQ

- Set the assistant's **Name** and **First message**.
- Press **Add question** and fill in the **Question**, **Answer** and **Keywords**. The chatbot matches what visitors type against the keywords.

> Add Hindi and Hinglish keywords too (kitna, kab, banwana) so more questions get an answer.

07 Blog and media

Blog posts

Articles at `/blog` that help people find you on Google. Posts have their own **Save** and **Publish** buttons, not Save and publish.

Publish a post:

1. Press **New post** and type the **Post title**. The web address fills in automatically.
2. Write the **Summary** and the article. Use the toolbar for headings, bold, links, lists, quotes and images.
3. Upload a **Cover image** (1600 × 900, landscape) and fill in **Describe the photo**.
4. Set the **Category** and **Tags**. Optionally fill in the **SEO title** and **SEO description**.
5. Press **Preview**, then **Publish**.

> - **Save** keeps the post as a private draft.
> - A future **Publish date** schedules the post.
> - An empty SEO title or description uses the post title or summary instead.

Media

The library of every uploaded image. The **Library** button on any picture field opens it.

- Drag photos in, or press **Choose images**. They save straight away.
- **Copy link** gives you an image's address.
- **Make old images smaller** speeds up pages that use old uploads.

> Deleting an image leaves a blank space wherever it was used on the site.

08 Site settings

Logo and company name

Company name, **Tagline** (shown in the footer) and **Logo**. The logo is used in the menu, footer, intro, browser tab, admin panel and Company profile PDF.

Contact details

Email, **Phone** (without +91), **WhatsApp number** (with country code, digits only), **Location**, and your Instagram, LinkedIn and YouTube links.

These details feed:

- the WhatsApp button
- lead emails
- the hero
- the Company profile PDF

Colour theme

- Pick a ready-made theme: Lavender (Spinex), Ocean blue, Emerald, Sunset orange, Rose, Teal, Royal gold or Graphite.
- Or set your own **Main colour** and **Dark colour**. Lighter and darker shades are made automatically.
- **Back to Spinex lavender** resets the colours.
- Press **Save and publish** to put the new colours on the website.

Intro & cursor

Intro animation:

- Turn it on or off with **Show the intro**.
- Pick a style: Logo reveal, Loading counter, Big letters, Split doors, Circle burst, Code typing, Stripes or Minimal.
- Choose when it shows, on which pages, the speed, the text and the colours.

Between pages: an animation when moving between pages. Choose None, Fade, Curtain, Colour wipe or Logo flash.

Mouse cursor:

- Tick **Show the custom cursor on desktop**.
- Pick a style: Dot and ring, Soft dot, Invert or Glow.
- Choose the **Cursor colour**.
- The custom cursor never shows on phones or tablets.

> If the intro plays on every visit, **Minimal** is the best choice. Visitors who turned on "reduce motion" don't see the intro or the custom cursor.

SEO

- **Google search result:** the home page **Page title** (under 60 characters), **Description** (140–160 characters) and **Keywords**, with a live preview.
- **Verification codes: Google verification code** and **Bing verification code**. You can paste the whole `<meta>` tag.
- **IndexNow: Tell Bing when pages change (IndexNow)** keeps Bing, ChatGPT search and Copilot up to date.
- **Home page text for search:** the **Heading**, **Text** and **Cities you serve**.
- **Quick links:** Sitemap, Robots and llms.txt.

> Services, products, projects, city pages and blog posts each have their own Google title and description fields.

WhatsApp and analytics

Only the owner or an admin can change these.

- **Floating WhatsApp button:** on or off, and the message filled in for the visitor.
- **Cookie banner:** on or off, and its text. While it is on, tracking runs only for visitors who press Accept.
- **Analytics:**
- **Google Analytics 4 ID** (starts with G-)
- **Microsoft Clarity project ID**
- **Meta (Facebook) Pixel ID**
- **Google Tag Manager ID**

Paste the ID and press **Save and publish**. Leave a field empty to turn that tool off.

09 Admin and security

Team and roles (owner only)

Add a team member:

1. Press **Add member**. Enter their **Name** and **Email**, and choose **Start from a role**.
2. Set a **Password** of at least 8 characters, then press **Add member**.
3. Share the login details privately. They log in at `/admin`.

On each member, you can:

- Click the role to fine-tune each area, then press **Save access**.
- **Block** them.
- Turn off their two-step login if they lost their phone.
- Reset their password.
- Remove them.

> Access changes apply on the person's next click. They don't need to log in again.

API keys (owner only)

Connect outside services:

- **Email alerts (SMTP)**
- **WhatsApp alerts**
- **Razorpay** payments
- **Leads from ads**
- **Google Calendar**
- **Google reviews**
- **AI chatbot**
- **Spam protection**
- **Webhook**

Most of these have a **Send test** button. Press **Save keys** when done.

> - Keys are stored encrypted. Only the last 4 characters are shown after saving.
> - **Custom code on every page:** paste code here only from services you trust.

Automation (owner only)

The scheduler behind every automatic reminder and backup.

- **Scheduler:** shows whether it is **Working**, and the private scheduler link.
- **Follow-up reminders:** the daily list of leads to follow up, with an optional WhatsApp summary.

- **AMC renewal reminders:** set how many days before the end of a plan to remind.
- **Automatic database backup:**
- Choose how often, and the email it goes to.
- **Email a backup now** or **Download backup now**.
- **Restore from a backup:** you must type RESTORE to confirm. A safety copy is saved first.
- **Uptime monitoring:** the health check link.

> Without the scheduler, no reminders or automatic backups happen. Backups don't include images, API keys or passwords.

Backup and restore

Saves or loads the **website content only** (text, images and settings) as `content.json`. Leads, invoices and other records are backed up in **Automation**.

- **Download content.json** before big changes.
- **Import content** replaces the live content. The current content is kept in History.
- **Restore defaults** brings back the original built-in content.

History, Activity log and My account

- **History:** the last 40 saved versions of the website content. Press **Restore** to go back; the current version is kept so you can switch back. Blog posts, leads and interns are not included.
- **Activity log:** who changed what, newest first. Filter by area. Entries are kept for one year.
- **My account:** your own login security.
- **Recovery email:** the inbox where "Forgot password?" sends the reset link. Set a real Gmail here if your login email is not a real inbox. On the login page you can type either email.
- Turn on two-step login: scan the QR code with Google Authenticator, type the code, press **Turn on**.
- Save your backup codes somewhere safe, not on the same phone. **Make codes** creates new ones and stops the old ones working.
- **Change password.**

> **Recommended:** turn on two-step login for every admin account.

10 Quick answers

Everyday tasks

I want to...	Go to
Call a new enquiry	**Leads** → open the lead → **Call**
Send a quotation	**Leads** → **Make quotation**, or **Quotes and invoices** → **New quotation**
Mark a payment as received	**Quotes and invoices** → open the invoice → **Payment received** → **Save**
Add a finished website to the portfolio	**Projects** → **Add project**
Publish a blog article	**Blog posts** → **New post** → **Publish**
Change the phone number or email	**Contact details**
Change the logo	**Logo and company name**
Change the top of the home page	**Homepage hero**
Hide a home page section	**Home page** → **Shown/Hidden**
Add a client review	**Client feedback** → **Approve**, or **Testimonials** → **Add testimonial**
Post a job	**Careers (jobs)** → **Add job**
Give a certificate to an intern	**Interns** → set Completed → **Issue certificate**
Run salaries	**Payslips** → **Make payslips** → **Issue and email all**
Give a staff member a login	**Team and roles** → **Add member**
Undo a wrong website change	**History** → **Restore**

If something goes wrong

- **My change isn't on the website.** Did you press **Save and publish**? Then refresh the website with Ctrl + Shift + R (or pull down to refresh on a phone).
- **"Not saved" message.** Someone else saved while you were editing. Press **Reload**, then make your change again.
- **"View only" banner.** Your role can't change this section. Ask the owner to update your access in **Team and roles**.
- **An image won't upload.** Keep it under about 4 MB and use JPG, PNG or WebP.
- **Reminders or review requests aren't going out.** Check that **Automation** says the scheduler is **Working**.
- **Emails aren't arriving.** Check **API keys** → **Email alerts** and press **Send test email**.

- **I'm locked out.** Use **Forgot password?** on the login page. The link goes to the **Recovery email** set in **My account** (or the login email if none is set). For two-step login, use a backup code, or ask the owner to turn it off for you.
